

Commercial SaaS Platform Structure

Vehicle Security Entry Logging System

1. PLATFORM DIRECTION

The platform is now a commercial SaaS product.

Target users:

- Hotels
- Estates
- Offices
- Security Companies
- Event Centers
- Residential Estates
- Corporate Facilities

The platform allows businesses to:

- Register online
 - Subscribe to plans
 - Add branches/locations
 - Manage staff and devices
 - Capture vehicle entries digitally
 - Use the platform with monthly or yearly subscriptions
-

2. WEBSITE STRUCTURE (PUBLIC WEBSITE)

2.1 Homepage

The homepage should feel security-focused and professional.

Homepage Design Direction

Use visuals related to:

- Hotel gate security
- Estate security checkpoints
- Security guards using phones/tablets

- Vehicle entry scanning
- Boom gates and access control

The homepage should immediately communicate:

- Security
 - Speed
 - Digital transformation
 - Accountability
-

3. HEADER / TOP MENU

Main Navigation

- Home
 - Features
 - Pricing
 - Industries
 - FAQ
 - Contact Us
 - Login
 - Get Started
-

4. HOMEPAGE SECTIONS

4.1 Hero Section

Text Example

"Replace Manual Vehicle Logging with a Smart Digital Security System"

Buttons

- Start Free Trial
 - Book Demo
-

4.2 Trusted Industries Section

Show industries using the platform:

- Hotels

- Estates
 - Security Companies
 - Corporate Offices
 - Event Centers
-

4.3 Features Section

Core Features

- Plate Number Capture
 - Offline Mode
 - Staff Tracking
 - Branch Management
 - OCR Plate Detection
 - Dashboard Reporting
 - Mobile App Support
 - Real-time Sync
-

4.4 How It Works Section

Step-by-step:

1. Create Account
 2. Add Locations
 3. Add Staff
 4. Install Mobile App
 5. Start Capturing Entries
-

4.5 Industry Solutions Section

Separate cards for:

- Hotel Security
 - Estate Security
 - Security Companies
 - Corporate Security
-

4.6 Pricing Preview Section

Simple pricing cards:

- Starter
- Business
- Enterprise

Each plan should display:

- Trial period
 - Included locations
 - Included staff/devices
-

4.7 FAQ Section

Questions such as:

- Does it work offline?
 - Can I add branches?
 - Can I track staff?
 - Is there a free trial?
 - Can I use my existing phones?
-

4.8 Footer

Include:

- Company Info
 - Terms
 - Privacy Policy
 - Contact Information
 - Social Links
-

5. PUBLIC PRICING PAGE

Pricing Structure

The pricing must be:

- Simple

- Flexible
 - Easy to understand
-

Base Pricing Example

Starter Plan

- 1 Location
- Limited Staff
- Trial Included

Business Plan

- Multiple Locations
- More Staff
- Advanced Reports

Enterprise Plan

- Unlimited Locations
 - Priority Support
 - Custom Features
-

Branch Pricing Logic

Example:

- Base Plan = ₦5,000/month
- Extra Branch = ₦1,000 or ₦2,000/month

The pricing system must support:

- Per location charges
 - Per device charges (optional)
 - Per staff charges (optional)
 - Add-on feature charges
-

6. USER REGISTRATION FLOW

Step 1: Create Account

Fields:

- Full Name
 - Email
 - Phone Number
 - Password
-

Step 2: Verify Account

- Email OTP or SMS OTP
-

Step 3: Create Organization

Fields:

- Organization Name
 - Organization Type
 - Main Location
-

Step 4: Brand Identity

Fields:

- Logo
 - Primary Color
 - Secondary Color
-

Step 5: Choose Subscription Plan

IMPORTANT: After signup, user must first go to the subscription selection page before accessing the dashboard.

7. SUBSCRIPTION FLOW INSIDE DASHBOARD

Subscription Page

This is different from the public pricing page.

The dashboard subscription page should:

- Show current plan
 - Show trial countdown
 - Show upgrade options
 - Show branch pricing
 - Show add-on pricing
-

Subscription Actions

User can:

- Start free trial
 - Upgrade plan
 - Add branches
 - Add features
 - Renew subscription
 - Change billing cycle
-

8. PAYMENT SYSTEM

Payment Methods

- Card
 - Bank Transfer
 - USSD (future)
-

Billing Cycles

- Monthly
 - Quarterly
 - Yearly
-

Subscription States

- Trial
 - Active
 - Expired
 - Suspended
-

9. USER ADMIN DASHBOARD

This dashboard is for hotels, estates, and security companies.

Dashboard Navigation

- Dashboard
 - Entries
 - Branches
 - Staff
 - Devices
 - Subscription
 - Billing
 - Settings
-

10. USER DASHBOARD OVERVIEW

Show:

- Total Entries Today
 - Active Branches
 - Active Staff
 - Active Devices
 - Subscription Status
-

11. BRANCH MANAGEMENT SYSTEM

Purpose

Allow organizations to manage multiple locations.

Branch Page

User can:

- Add Branch
 - Edit Branch
 - Disable Branch
-

Branch Fields

- Branch Name
 - Branch Address
 - Branch Code
 - Assigned Devices
-

Branch Pricing Logic

When adding branch:

- System calculates additional charge automatically

Example:

- First location included
 - Additional branch = ¥1,000/month
-

12. STAFF MANAGEMENT

Features

- Add Staff
 - Edit Staff
 - Disable Staff
-

Fields

- Staff Name
- Staff ID
- Phone Number
- Assigned Branch

13. DEVICE MANAGEMENT

Features

- Register device
- Remove device
- Monitor last sync

Device Data

- Device ID
- Assigned Branch
- Last Active Time

14. ENTRY MANAGEMENT

Features

- Search entries
- Filter by branch
- Filter by staff
- Filter by date

Entry Data

- Plate Number
 - Phone Number
 - Staff ID
 - Branch
 - Timestamp
-

15. SETTINGS PAGE

Sections

Organization Settings

- Name
- Contact Info

Brand Identity

- Logo
- Colors

System Settings

- Enable Notes
 - Enable Phone Number
 - OCR Settings
-

16. BILLING PAGE

Features

- Current Subscription
 - Billing History
 - Download Invoice
 - Upgrade Plan
 - Renew Subscription
-

17. SUPER ADMIN DASHBOARD

IMPORTANT: This dashboard is separate from customer dashboards.

Only platform owners can access this.

18. SUPER ADMIN FEATURES

Platform Overview

- Total Customers
 - Active Subscriptions
 - Expired Accounts
 - Revenue
 - Active Devices
 - Total Entries Captured
-

Customer Management

Super admin can:

- View all organizations
 - Suspend accounts
 - Activate accounts
 - Upgrade customers manually
 - Extend trial periods
-

19. PLAN MANAGEMENT SYSTEM

Super admin must be able to:

- Create plans
 - Edit plans
 - Delete plans
 - Add pricing
 - Add features
 - Set trial days
-

Plan Configuration

Each plan can have:

- Number of branches
- Number of staff
- Number of devices
- OCR access
- Analytics access

- Export access
-

20. FEATURE MANAGEMENT

Super admin can create paid add-ons.

Examples:

- Extra branch
 - Extra staff slots
 - Extra devices
 - Advanced analytics
 - Export reports
-

21. SUBSCRIPTION ENGINE

The system should automatically:

- Start trials
 - Track expiration dates
 - Disable expired accounts
 - Send renewal reminders
 - Apply branch pricing
-

22. NOTIFICATION SYSTEM

Send notifications for:

- Trial ending
 - Subscription expiry
 - Payment success
 - Failed payment
-

23. MOBILE APP FLOW

Guard Flow

1. Open App

2. Enter Organization Code
 3. Enter Staff ID
 4. Start Shift
 5. Capture Vehicle Plate
 6. Save Entry
 7. Sync Automatically
-

24. KEY BUSINESS RULES

- Platform must remain simple
 - Mobile flow must stay fast
 - Offline mode is mandatory
 - Every entry must be tied to staff
 - Branch pricing must calculate automatically
-

25. FUTURE FEATURES

Not required now:

- Facial recognition
 - Visitor pass printing
 - Boom gate integration
 - AI analytics
 - Multi-country support
-

26. FINAL PRODUCT STRUCTURE

The platform now consists of:

1. Public Website
 2. Customer Dashboard
 3. Super Admin Dashboard
 4. Mobile App
 5. Subscription System
 6. Branch Management System
 7. Billing & Pricing Engine
 8. Offline Sync Engine
 9. OCR Plate Recognition System
-

27. FINAL GOAL

The goal is to create a scalable commercial platform that allows security organizations to:

- Digitally capture vehicle records
- Manage branches
- Track staff activity
- Operate offline
- Subscribe online
- Scale easily across multiple locations
